## OIL AND GAS AUTOMATION SYSTEM (OGAS)

### Zanzibar Connections Company Limited – ComNet

ComNet is a market leader for automation systems and control technologies, supplying products and solutions at all levels of process control in oil and gas in Tanzania. Our cost effective, compact products are perfectly designed for remote automation solutions in well head, pipeline and pumping/compression stations applications. We offer redundancy, integrated human machine interface, flow calculation and programmable logic controllers functions to create custom solutions that cover the full range of oil and gas functionality

Remote automation devices offered by ComNet support a range of functions, from monitoring, remote control and automation, flow calculation to custody transfer support, communication gateway and local data storage. We provide integrated automation solutions that deliver added value.

ComNet minimizes customer risk by providing integrated products and solutions as the main automation contractor. a full range of instruments and field devices, combined with applications such as pumping/compressing station automation, leak detection system, management information system, pipeline efficiency monitoring, valve station automation and communication systems.

### ComNet: Oil and Gas Automation System Usage

- Remote monitoring and reporting over pumping/compressing station operations
- Provision of control over technological processes and forecourt equipment (fuel dispensers, ATG systems, price boards, car washes, others)
- Automated measurement and commercial account at petroleum products
- Provision of sales of retails products using various payment forms
- Automated reporting over pumping/ compressing station operations
- Provision of automated discount-bonus loyalty cards system for customers

### ComNet: Oil and Gas Automation System benefits

- Detect, diagnose, and prioritize emerging performance and reliability problems without pulling rods or tubing
- Reduced Pump and compressors failures
- Lower Electrical Costs as a result of optimizing pumping/compressing units and motors
- Lower operation costs due to reduced spending on engineering, start-up and maintenance
- Best use of technology using integrated solutions designed for long-term benefits
- Utilizing of a single integrated team with global reach and resources hence minimizing risks
- Reduced expediting and inspection due to a single-source supplier
- Chemical Costs reduction by Optimizing the Chemical Treatment Plan
